

BLACKBERRY ARCHIVING

Easily capture Blackberry communications for compliance and eDiscovery.

ARCHIVE ALL COMMUNICATIONS USING YOUR EXISTING INFRASTRUCTURE

The Blackberry smartphone was once the most popular mobile device for enterprise use. Famous for its easy-to-use full QWERTY keyboard, it facilitates typing on a small form factor. While Blackberry devices do not currently enjoy the same popularity, it still boasts tens of millions of users.

Communications taking place over Blackberry devices – Blackberry Pin-to-Pin, Blackberry Messenger, and Blackberry SMS/MMS – can easily be archived when adding Merge1 to your existing infrastructure. As opposed to other archiving compliance solutions, which require sending your workforce’s critical, sensitive communications to a third party data store, Merge1 captures Blackberry communications and stores them in your existing email archive, whether on-prem (e.g. Veritas Enterprise Vault) or in the Cloud (e.g. Microsoft Office 365).

Once archived, Blackberry communications can be retained, supervised for compliance and searched for eDiscovery and internal Information Governance.

MERGE1 FOR BLACKBERRY FEATURES

- Preserves headers, original message time and other data for accurate search and retrieval during eDiscovery
- Captures custom headers (where applicable) to allow for easy search
- Updates versions
- Captures files

BENEFITS OF MERGE1:

- ✓ Preserves headers, original message time and other data for accurate search and retrieval during eDiscovery
- ✓ Captures custom headers (where applicable) to allow for easy search

Archive popular message content types including social media, IM, financial platforms, and Cloud-based content

Merge1 archives dozens of content types and can be customized to archive any content.

Archiving all your content with Merge1 helps you comply with industry regulations and enhances your eDiscovery results.

The ideal combination of power and simplicity

- Archive agnostic
- Fully customizable
- On-prem or Cloud
- Easy to set up and deploy

“Merge1 is an integral and invaluable tool. My team uses Merge1 to meet company needs for capturing EML/ Reuters, Blackberry, Symphony and Bloomberg data. The product is intuitive, easy to set up, and I appreciate the personalized sale and support attention we receive. I would recommend Merge1 to anyone.”
