

Energy & Utilities Compliance and eDiscovery Made Easy

Use your existing archive to comply with Energy and Utility compliance regulations, including the FERC, DOE, NERC, CFTC, and State regulations.

ENERGY AND UTILITY COMPANIES MUST ARCHIVE COMMUNICATIONS

Regulated Energy and Utility services companies are required by law to archive, retain and supervise business communications. Regulations from the Department of Energy (DOE), The Federal Energy Regulatory Commission (FERC) and The North American Electric Reliability (NERC) lay out specific mandates around communications that must be retained, including those taking place over social media, mobile devices, and messaging platforms. Failure to comply with these rules can lead to fines and has resulted in a number of high-profile enforcement cases where companies were penalized for failure to adhere to messaging compliance rules.

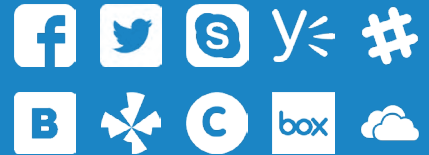

MERGE1 HELPS ENERGY AND UTILITY COMPANIES MEET COMPLIANCE REGULATIONS EFFICIENTLY

Since 2005, Merge1 by Globanet has helped Energy and Utility firms quickly and easily gain compliance with messaging regulations. Merge1 was designed to help facilitate compliance by using your current infrastructure. Merge1 extends your existing email archive to capture various content types and communications channels, including social media, instant messaging (IM), mobile, Cloud-based files and collaboration platforms like Slack and Yammer. Once messages and content from these platforms are ingested into your archive, they can be retained according to retention rules, supervised for compliance and searched during eDiscovery.

BENEFITS OF MERGE1 FOR ENERGY AND UTILITY COMPANIES :

- ✓ Avoid fines, penalties and other enforcement actions by regulatory bodies such as the DOE, FERC and NERC
- ✓ Mitigate risk involving internal investigations, external audits and lawsuits
- ✓ Reduce compliance related costs and recurring fees

Archive popular message content types including social media, IM, financial platforms, and Cloud-based content

Merge1 archives dozens of content types and can be customized to archive any content.

Archiving all your content with Merge1 helps you comply with industry regulations and enhances your eDiscovery results.

The ideal combination of power and simplicity

- Archive agnostic
- Fully customizable
- On-prem or Cloud
- Easy to set up and deploy

"Merge1 is an integral and invaluable tool. My team uses Merge1 to meet company needs for capturing EML/ Reuters, Blackberry, Symphony and Bloomberg data. The product is intuitive, easy to set up, and I appreciate the personalized sale and support attention we receive. I would recommend Merge1 to anyone."
