

# Pharmaceutical & Healthcare Compliance and eDiscovery Made Easy

Use your existing archive to comply with Pharmaceutical and Healthcare compliance regulations, including FDA, HIPAA, FDCA, and ARRA.

## PHARMACEUTICAL AND HEALTHCARE FIRMS MUST ARCHIVE COMMUNICATIONS

Regulated Pharmaceutical and Healthcare companies – including hospitals, pharmacies, and doctors offices – are required by law to archive, retain and supervise business communications. Regulations from The Food and Drug Administration (FDA) and The Health Insurance Portability and Accountability Act (HIPAA) lay out specific mandates around communications that must be retained, including those taking place over social media, mobile devices, and messaging platforms. Failure to comply with these rules can lead to fines and has resulted in a number of high-profile enforcement cases where companies were penalized for failure to adhere to compliance rules.

## MERGE1 HELPS PHARMACEUTICAL AND HEALTHCARE FIRMS MEET MESSAGING REGULATIONS EFFICIENTLY

Since 2005, Merge1 by Globanet has helped Pharmaceutical and Healthcare firms quickly and easily gain compliance with messaging regulations. Merge1 was designed to help facilitate compliance by using your current infrastructure. Merge1 extends your existing email archive to capture various content types and communications channels, including social media, instant messaging (IM), mobile, Cloud-based files and collaboration platforms like Slack and Yammer. Once messages and content from these platforms are ingested into your archive, they can be retained according to retention rules, supervised for compliance and searched during eDiscovery.

## BENEFITS OF MERGE1 FOR PHARMACEUTICAL AND HEALTHCARE FIRMS:

- ✓ Avoid fines, penalties and other enforcement actions by regulatory bodies such as FDA and HHS
- ✓ Mitigate risk involving internal investigations, external audits and lawsuits
- ✓ Reduce compliance-related costs and recurring fees
- ✓ Capture all communications
- ✓ Maintain control over your data

Archive popular message content types including social media, IM, financial platforms, and Cloud-based content

Merge1 archives dozens of content types and can be customized to archive any content.

Archiving all your content with Merge1 helps you comply with industry regulations and enhances your eDiscovery results.

The ideal combination of power and simplicity

- Archive agnostic
- Fully customizable
- On-prem or Cloud
- Easy to set up and deploy

*"Merge1 is an integral and invaluable tool. My team uses Merge1 to meet company needs for capturing EML/ Reuters, Blackberry, Symphony and Bloomberg data. The product is intuitive, easy to set up, and I appreciate the personalized sale and support attention we receive. I would recommend Merge1 to anyone."*
